Peter and Susan,

Attached is a revised draft of the AGREMAX characterization for Region 2. I believe that this version is suitable for QA and internal peer review. There are two files – the Word document is the main report plus Appendix A (Results) and half of Appendix B (QA/QC). The PDF is the detailed QA/QC reports that Rossane generates which cannot be easily incorporated into the MS Word document. Also, I'm including a track changes version showing the changes that have been made since the version I distributed on Monday.
